

Shreyas Jani

Software engineer with a passion to build good products and user experiences which not only look pleasing to the eye, but convert. Primarily worked with Fintech and Ecommerce startups.

EXPERIENCE

Paytm, Andheri, Mumbai — Software engineer

MAY 2020 - Present

Paytm Insurance - May 2020 - Dec -2020

Software engineer responsible for the development of in-house style component framework for CSS to reduce dependency on tailwindcss and bootstrap. Worked on Vue JS on the insuretech domain, moved to ReactJS when my team and I were moved to lending tech. Helped build a JSON schema based render layer to reduce component building.

Lending Tech - Jan 2021 - Present

Helped create Json schema based architecture for seamless delivery of react based frontend components. Looking at overall CSS architecture. Managing releases on prod environments. Improving performance of the lending verticals by refactoring code, optimizing assets and overall react app performance.

Working on overall dev integration optimization, delivery of products, improving developer experience and, in the process of building an automated regression suite for all the verticals.

Aza Fashions, Prabhadevi, Mumbai — Sr. Front End Developer

APRIL 2020 - MAY 2020

Sr frontend developer responsible for sitewide implementation of front-end tasks. Tasked with helping migrate the existing website to a VueJS based implementation in the later half of 2020.

Leading the frontend architecture. Setup webpack, PostCSS, flexbox, CSS grid layouts to write custom stylesheets while using Tailwind CSS as the preferred CSS framework in place of Bootstrap 4 for ease of writing scalable CSS.

Hindi, Gujarati, Marathi,
English..

PROJECT HIGHLIGHTS

React JS, coverfox.com, full time

Hands on experience with quote forms for Car, Bike and Term products of Coverfox.com. Made modular quote forms for landing pages per requirement from the business team. Quote widget for homepage, landing pages, article pages.

React JS, theweddingbrigade.com, full time

Built the checkout form in React to ensure faster checkout. Currently rewriting the product listing front end in React JS.

AMP Components, coverfox.com, full time

Built from scratch and scaled on AMP infrastructure for articles for all the categories. Hands on experience with AMP restrictions, workarounds and ensuring the pages are structured as per requirement from the SEO team.

Bootstrap 3 - 4 Migration, theweddingbrigade.com, full time

Major overhaul on the existing Bootstrap 3 framework and building new components and converting existing components to Bootstrap 4 while ensuring the sanity of the website.

Utility first CSS, theweddingbrigade.com, full time

Reducing dependency on Bootstrap 4 to reduce codebase bloat and write custom, utility based css for the organizational needs.

Mogra Banquets, mograbanquets.com, theweddingbrigade.com, full time

New website for mograbanquets.com, the banqueting arm of theweddingbrigade.com

Aza Fashions, azafashions.com, full time

Setting up the frontend architecture for Aza Fashions post the companies decision to setup an internal tech team. Helping write scalable CSS using PostCSS and Tailwind CSS. Introducing CSS grids, Flexbox into a codebase that is largely unscalable. Modular components for PDP, Checkout. Planned VueJS framework for the frontend in the second half of 2020.

Scalable UI Architecture, pixeldust.in, freelance

Freelance UI development for a third party project for Pixeldust. Manage and maintain the front end codebase using PostCSS. This project is an admin dashboard which helps the organizers track events that are currently underway in colleges.
